January, 08 2008

I strongly support AM on FM. Currently KCHU, Terminal Radio, Inc. is trying to fill in gaps in our coverage area. Because of our large mountainous area, we have communities without local radio service. Many of the communities that don't have the service are isolated and could be argued they need the service more than the larger communities.

I appreciate you considering this issue that will have many residents of the Copper Basin in Alaska very happy.

Thank you

Danny Sparrell
General Manager
Terminal Radio, Inc.
